## **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

## **Listing of Claims:**

2

Claim 1 (currently amended): An end closure assembly for a pressure 1 2 vessel, the end closure assembly comprising: 3 a non-metal universal head member positioned in an opening in the pressure vessel, wherein the universal head member has a size complementary to the 4 5 opening in the pressure vessel; 6 a retainer ring member engaged with the pressure vessel for retaining the universal head member in the opening in the pressure vessel; and 7 a securing plate member engaged with the retainer ring member for securing 8 9 the retainer ring member. wherein the retainer ring member is made of at least two arced elements that 10 11 are movable relative to each other. 1

- Claim 2 (original): The end closure assembly of claim 1, further comprising an elliptical head member.
- Claim 3 (original): The end closure assembly of claim 2, wherein the elliptical head member is in contact with the universal head member.
